

Pole Saws & Hook Pruner

Pole Saws & Hook Pruners

RGC offers lightweight Pole Saws and Hook Pruners that are ideal for landscaping, grounds keeping and farming. Utility companies and municipalities also benefit from their versatility and low maintenance.

These tools are tested to meet OSHA Regulation 1910.269 for use near live power lines. They're designed to cut hard to reach branches from an aerial basket or the ground.

Features & Benefits

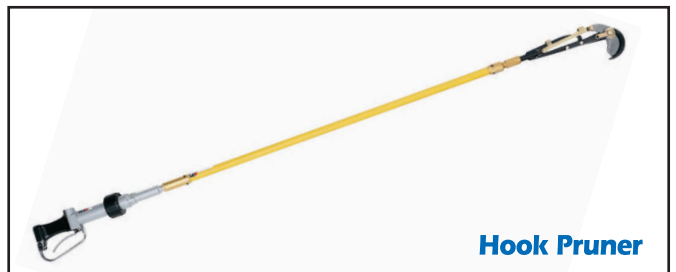

- Durable, lightweight design reduces operator fatigue and increases productivity.
- Insulated fiberglass pole construction allows safe operation near power lines.
- Each tool can be changed from an open- to closed-center circuit.
- Rugged high torque gear motor.
- The pole chain saw has an anti-kickback .325 in. pitch chain and automatic chain oiler.
- Pole chain saw safety features include: two-step trigger, trigger guard, and fully covered sprocket guard.
- The pole circular saw has an angular head design that makes flush cuts easier and directs chips away from the operator.
- Pole circular saw safety features include: hand stop collar, trigger guard, two step trigger and branch stop.
- The hook pruner cuts up to 2 in. diameter branches and provides full power return.
- Hook pruner safety features include: trigger guard and heat-insulated handle.
- Pole Saws and Hook Pruners can be powered by an RGC HydraPak or any other compatible hydraulic power source.
