## ROOFING BRACKETS, SHINGLERS, LADDER HOOKS AND LADDER ARMS

RGC complements its line of premier hoisting products with an assortment of Roof Brackets, Shinglers, Ladder Hooks and Ladder Arms to assist you with virtually any roofing job.

Roof Brackets are available in sizes to accept 2 x 6, 2 x 8 or 2 x 10 planks. The two styles of Shinglers hold a 2 x 4 by either the 2 in. or 4 in. side. Ladder Hooks help position and secure a ladder in place on the roof. Ladder Arms support the ladder without allowing it to rest directly against the roof edge or gutter.

### 2 X 6 ROOFING BRACKETS

#### Standard 45°

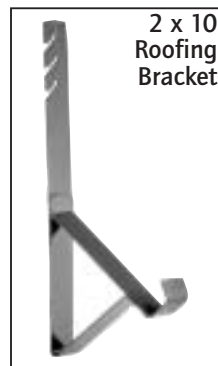

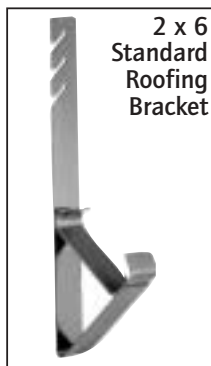

Holds a 2 x 6 wood plank snugly with no rocking or tipping. Can be used on all slopes up to a 12/12 pitch. Bracket can be removed without raising or damaging the shingle. Weight - 32 lbs. per doz.

#### 2 x 6 - 60°

Similar to the standard bracket described above except that it holds a wood plank at 60° to the roof pitch. Weight - 32 lbs. per doz.

#### 2 x 6 - 90°

Similar to the standard bracket described above except that it holds a wood plank at 90° to the roof pitch. Weight - 32 lbs. per doz.

### 2 X 10 ROOFING BRACKETS

#### Standard 45°

Similar to the 2 x 6 standard bracket except that it holds a 2 x 10 wood plank for an extra wide work platform. Weight - 40 lbs. per doz.

### LADDER HOOK WITH WHEEL

The wheel makes moving and aligning a ladder an easy task. The swivel plate allows a ladder to be placed in the valley between gables. The plate prevents the hook from cutting into asphalt shingles. Weight - 6 lbs. each.

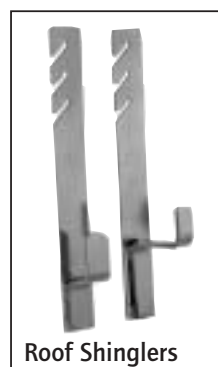

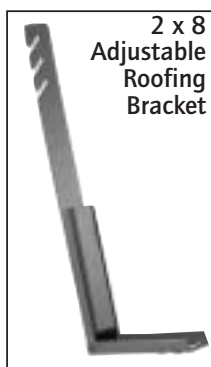

### LADDER ARMS

A pair of arms supports a ladder without allowing it to contact the roof edge or gutter. Weight - 4 lbs. per pair.

### 2 X 8 ADJUSTABLE ROOFING BRACKETS

#### Adjusts to Roof Pitch

A locking device is provided to prevent accidental closing at 45° and 56°. Holds a 2 x 8 wood plank for a wide horizontal platform. Three parts form a sturdy triangle. When folded they form a solid rectangular box for easy storage. Weight - 38 lbs. per doz.

### ROOF SHINGLERS

#### Narrow

Fits a 2 x 4 wood plank on edge to make a safe toe hold on shallow pitched roofs. The wide, thin strap allows the bracket to be removed without raising the shingles that are laid over it. Weight - 21 lbs. per doz.

#### Wide

Similar to the narrow model described above except that the 2 x 4 plank is held on the 4 in. side. Weight - 24 lbs. per doz.
