Standard Aluminum Docks

RGC Advantage

RGC Standard Docks combine the physical strength of quality marine grade aluminum and the engineering expertise of the most experienced boat lift and dock manufacturer in the industry. Choose any of our quality Standard Dock options and customize your system to meet your specific requirements.

RGC Standard Dock featuring 4' x 10' Dock Sections with Premium Cedar Decking and Adjustable Extension Legs with bracing

Powder-Coated Aluminum Decking

Applications

- Standard Dock Systems are the ideal choice for residential applications.
- Standard Docks are adaptable to various water depths and shorelines.
- The sections are easily arranged to meet both esthetic and functional requirements.

Features & Benefits

- Standard Docks are manufactured of quality marine grade aluminum and assembled with stainless steel fasteners for minimal maintenance and greater durability.
- A Standard Dock System is the ideal choice for residential applications.
- Standard 5/4 deck options allow you to create the look you want. Choose from Powder-Coated Aluminum, Premium Cedar or supply your own Pressure-Treated Wood.
- Modular 4 ft. x 10 ft. sections easily arrange into a variety of dock system layouts to meet both functional and esthetic requirements.
- Pivoting Foot Plates conform to surface for secure positioning.
- Pin-Style Adjustable Legs adjust independently up to 16 in. and allow significant leveling capabilities in water up to 9 ft. deep.
- Substantial bracing provides extra stability.
- Easy assembly without special tools permits quick installation and adjustability.
- Customize your dock with the variety of great accessories to suit your application.
- 15 year limited warranty on aluminum materials and workmanship.
